Profile

Zouhair El-Mariami is an enthusiastic frontend developer with a keen eye for detail and design. His specialty is developing IT projects from a technical and user experience design approach.

Zouhair analyzes situations and thinks about valuable and efficient contributions to the project.

Zouhair translates client wishes in concise requirements. Zouhair is communicative and enjoys expanding his network. He's focused on delivering the best possible results and on improving on a daily basis.

Career

Zouhair graduated in IT & Media Design, where he studied web development and user experience design and specialized in frontend development.

Zouhair developed web applications for companies such as Capgemini, ABN AMRO, PIDZ and Cross Internet specifically tailored for certain user groups.

As a developer, Zouhair has experience working on applications from a multidisciplinary approach. These include programming, testing, designing and communication.
